Animal Hospital of Statesville
Statesville, NC

In October of 2009, two boxers, a brother and sister, came into the Animal Hospital of Statesville waiting to be adopted by boxer rescue. Several staff members told me that they were here and I needed to take a look at them. One look and the female won my heart and became our new puppy, Kendra.

My last boxer was euthanized on March 10th of 2010 due to Osteosarcoma. That was a great loss for me and having pet insurance would have been great during that time. Maybe with insurance I could have afforded to do more treatments, giving him a longer life.

When Kendra was 4 months, I signed up for Trupanion's 30 day trial. I was convinced that pet insurance was the way to go with another boxer. Like most puppies, she loves to chew and swallow things. We were always calling her out to drop something or spit something out. On March 5th, her daddy got home from work and she was not acting right, vomiting over and over again. We determined she probably ate something that didn't agree with her and it would pass. Well, not the case this time. After I got home three hours later she was still vomiting and starting to get lethargic. I presented her to Dr. La Roche for an exam the next day. After X-rays, a G.I. Series and blood work, she was diagnosed with a Gastro-Intestinal problem, most likely due to something she ate. After looking over the back yard, we found that she had chewed and ate on a Butterfly bush and several other earth-like items in the yard that caused her sickness.

Thank goodness for Trupanion. I submitted a simple form with my invoice and received 90% of that invoice minus my deductible. **Thanks to the great care of her veterinarian and Trupanion helping with the cost we were happy parents again and she was back to her crazy self.** I am so grateful for the introduction to Trupanion. With their affordable, quick and hassle free process I was able to get the treatment and care Kendra needed and received a payment within 5 days.

Thank you Trupanion.
